Local Health Department Role in Preventing and Reducing Obesity and Chronic Diseases among Children and Youth

Chronic Disease

Online/Print

February 2014

The National Association of County and City Health Officials (NACCHO) produced this issue brief to describe the childhood obesity epidemic and discuss the emergence of chronic disease in children, specifically diabetes and hypertension. The issue brief also identifies strategies and resources to help local health departments (LHDs) address this public health challenge in their communities.

Model Practices Case Study: Jefferson County Health Department Successes in Diabetes Prevention

Chronic Disease

Online

December 2013

In 2007, JCDHE won a Model Practice Award from the National Association of County and City Health Officials (NACCHO) for the program "La Buena VIDA (Victory in Diabetes Awareness): A Promotor Approach to Diabetes Education and Lifestyle Modification." Since 2003, NACCHO's Model Practices Program has honored initiatives, programs, resources, and tools that demonstrate how local health departments and their community partners can effectively collaborate to address local public health concerns.

The Role of Local Health Departments in Promoting Healthy Beverages: Increasing Healthy Beverage Options in Hospitals

Chronic Disease

Online

October 2013

To reduce the complications associated with consumption of SSBs, local health departments (LHDs) and their community partners are working together to create conditions that help people make healthier choices. One key way that LHDs are working to reduce consumption of SSBs is by partnering with hospitals and healthcare organizations to encourage changes to procurement policies and food and beverage standards that increase healthier beverage options.

The Role of Local Health Departments in Promoting Healthy Beverages: Changing Procurement Standards to Increase Access to Healthier Beverages

Chronic Disease

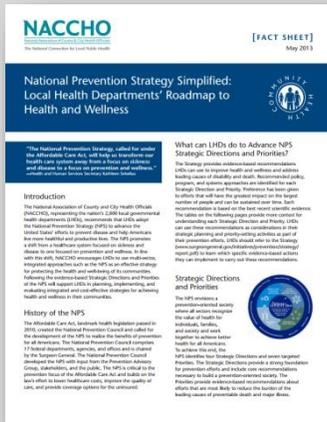

Online

October 2013

To reduce the complications associated with consumption of SSBs, local health departments (LHDs) and their community partners are working together to create conditions that help people make healthier choices. One key way that LHDs are working to reduce consumption of SSBs is through the development of food and beverage standards that provide guidelines for the types of food and beverages purchased and served on city or county properties.

National Prevention Strategy Simplified: Local Health Departments' Roadmap to Health and Wellness

Chronic Disease Online May 2013

The National Association of County and City Health Officials (NACCHO), representing the nation's 2,800 local governmental health departments (LHDs), recommends that LHDs adopt the National Prevention Strategy (NPS) to advance the United States' efforts to prevent disease and help Americans live more healthful and productive lives. The NPS promotes a shift from a healthcare system focused on sickness and disease to one focused on prevention and wellness. In line with this shift, NACCHO encourages LHDs to use multi-sector, integrated approaches such as the NPS as an effective strategy for protecting the health and well-being of its communities.

Action Communities for Health, Innovation, and Environmental Change (ACHIEVE)

Chronic Disease Online October 2013

The National Association of County and City Health Officials (NACCHO), along with four other national partner organizations, is advancing the nation's efforts to prevent chronic diseases and related risk factors through a collaborative approach called Action Communities for Health, Innovation, and Environmental Change (ACHIEVE), supported by the Centers for Disease Control and Prevention's Healthy Communities Program.

Big Cities Chronic Disease Community of Practice: Summary of the November 2009 Meeting

Chronic Disease Online January 2010

The Big Cities Chronic Disease Community of Practice (BC-COP) consists of health officials or senior-level chronic disease programmatic staff from local health departments (LHDs) representing the 50 largest cities and metropolitan areas in the United States based on population size. BC-COP's goal is to identify priorities and develop strategies for addressing chronic disease prevention for LHDs serving large populations and provide a unified voice in national policy discussions while maintaining communication with communities impacted by proposed policies.

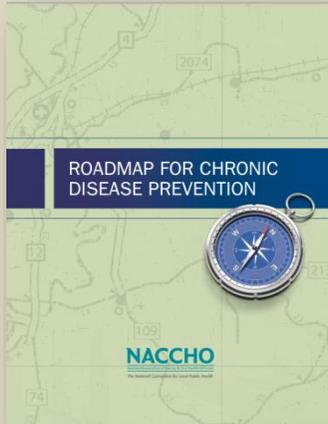

Million Hearts: Talking Points for Local Health Department Leaders

Chronic Disease Online

Million Hearts™, a national initiative designed to prevent 1 million heart attacks and strokes in the United States by the end of 2017, was launched in September 2011 by the federal government. The Centers for Disease Control and Prevention and Centers for Medicare & Medicaid Services co-lead Million Hearts™. The American Heart Association, YMCA and other Private-sector organizations have significant participation in the initiative. Forging strong partnerships is important to the program's success.

Roadmap for Chronic Disease

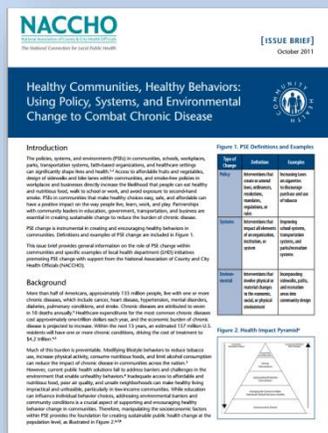

Chronic Disease

Online/Print

The Roadmap for Chronic Disease Prevention (Roadmap) is not only a guide for individual LHDs seeking to prevent chronic disease in their communities, but can stimulate the development of an interrelated LHD and community network when used simultaneously by multiple LHDs. A rudimentary infrastructure for such a network is already in place. The nation's 2,794 LHDs reach into nearly every community in the United States and support the health of more than 308 million people living in those LHDs' jurisdictions.

Healthy Communities, Healthy Behaviors: Using Policy, Systems, and Environmental Change to Combat Chronic Disease

Chronic Disease

Online/Print

October 2011

This issue brief provides general information on the role of PSE change within communities and specific examples of local health department (LHD) initiatives promoting PSE change with support from the National Association of County and City Health Officials (NACCHO).

Chronic-Disease Management: The Role of Local Health Departments in Reducing Sugar-Sweetened Beverage Consumption

Chronic Disease

Online/Print

August 2012

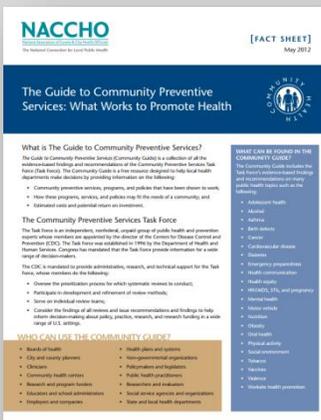

This issue brief analyzes systematic efforts to reduce the consumption of sugar-sweetened beverages (SSBs). The brief will address the characteristics of SSBs, explain how these products contribute to chronic illness, and discuss ways that LHDs can increase public awareness and strengthen prevention efforts.

Building Healthier Communities: Local Health Departments Implement the ACHIEVE Initiative

Chronic Disease

Online/Print

May 2012

The Centers for Disease Control and Prevention's Action Communities for Health, Innovation, and Environmental change (ACHIEVE) program seeks to create healthier places where people live, learn, work, and play. Since 2008, the National Association of County and City Health Officials (NACCHO) has collaborated with the National Association of Chronic Disease Directors, the National Recreation and Park Association, the YMCA of the USA, and the Society of Public Health Educators to provide training, technical assistance, and support to 149 ACHIEVE communities across the nation.

NACCHO Resources Help Local Health Departments Fight Obesity and Chronic Disease

Chronic Disease

Online/Print

April 2010

NACCHO received funding from the Leadership for Healthy Communities program of the Robert Wood Johnson Foundation in early 2010 to mobilize local health department (LHD) teams across the southeast United States to support local policy changes that promote healthy eating and active living to reduce the burden of childhood obesity.

NACCHO Supports Local Health Departments' Chronic Disease Self-Management Programs

Chronic Disease

Online/Print

June 2013

The National Association of County and City Health Officials (NACCHO), with support from the Centers for Disease Control and Prevention's Division of Diabetes Translation (CDC/DDT), Division of Population Health, and Office of State, Tribal, Local and Territorial Support (CDC/OSTLTS), is supporting 12 local health departments (LHDs) to develop or enhance their capacity to deliver effective chronic disease self-management programs.

2010 National Profile of Local Health Departments: Diabetes Prevention and Control

Diabetes

Online

October 2011

This research brief highlights the results of the 2010 National Profile of Local Health Departments (Profile) that are relevant to LHD diabetes prevention and control activities. Additionally, it offers a glimpse back at the 2008 Profile to follow trends and changes that have occurred in these services over time. The data reported in this research brief reflect services directly provided by LHDs and do not include information on services in a jurisdiction offered by other agencies/organizations.

Diabetes Today: Planning for Coalition Action in Local Health Departments

Diabetes

Online

June 2012

This report provides an in-depth examination of the Diabetes Today training and examples of how LHDs have successfully built coalitions, implemented programs, changed policy and systems, and leveraged funding and resources post-training. It also outlines the various challenges each participating LHD has faced and maps out the future for the Diabetes Today training, both at the local and national level.

Documentation Considerations for Accreditation: Diabetes Prevention and Control

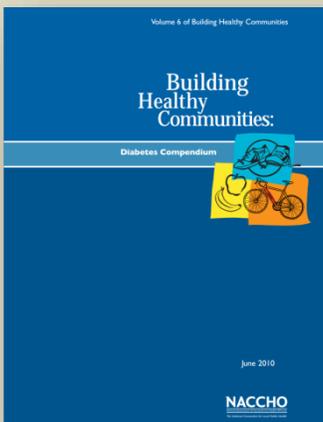

Diabetes

Online

August 2013

In this fact sheet, the National Association of County and City Health Officials (NACCHO) has highlighted several of the 12 domains that may be relevant to local diabetes programs and some of the standards and measures contained therein. This document also includes ideas for potential documentation that relate to diabetes and diabetes risk factors and links to examples that LHDs have submitted from NACCHO's Documentation Library.

Building Healthy Communities: Diabetes Compendium

Diabetes

Online/Print

June 2010

NACCHO designed this compendium to (1) highlight various LHD diabetes prevention and control programs; (2) assist LHDs in designing new or enhancing existing diabetes prevention and control programs; and (3) assist LHDs in identifying additional resources and peer assistance to develop and implement diabetes prevention and control programs.

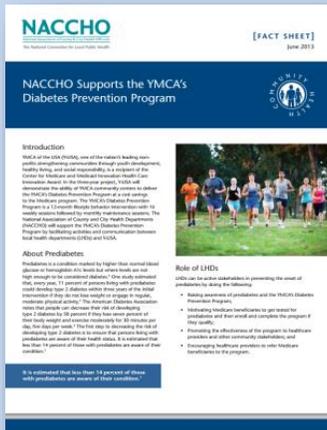

CHRONIC DISEASE PREVENTION PUBLICATIONS LIST

NACCHO Supports the YMCA's Diabetes Prevention Program

Diabetes

Online/Print

June 2013

The YMCA's (Y-USA) Diabetes Prevention Program is a 12-month lifestyle behavior intervention with 16 weekly sessions followed by monthly maintenance sessions. The National Association of County and City Health Departments (NACCHO) will support the YMCA's Diabetes Prevention Program by facilitating activities and communication between local health departments (LHDs) and Y-USA.

Documentation Considerations for Accreditation: Tobacco Prevention and Control

Tobacco

Online

August 2013

In this fact sheet, the National Association of County and City Health Officials (NACCHO) has highlighted several of the 12 domains that may be relevant to local tobacco programs and some of the standards and measures contained therein. This document also includes ideas for potential documentation that relate to tobacco and links to examples that LHDs have submitted from NACCHO's Documentation Library.

Building Healthy Communities: Action Planning for Tobacco Prevention and Control

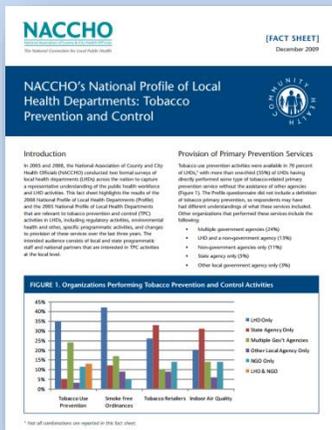

Tobacco

Online

April 2012

This report highlights the efforts of sites that participated in tobacco prevention and control coalition capacity-building assistance from the National Association of County and City Health Officials (NACCHO) and the National Association of Local Boards of Health (NALBOH). Additionally, the report outlines the role of local health departments (LHDs) and local boards of health (LBOHs) and provides details about evidence-based tobacco prevention and control.

National Profile of Local Health Departments: Tobacco Prevention and Control

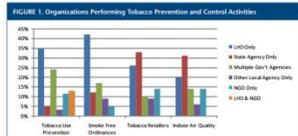

Tobacco

Online

December 2009

NACCHO surveyed local health departments across the nation to provide a comprehensive picture of local health departments' structures, workforce, financing, governance, activities, and services. This research brief highlights the results of the study, the 2010 National Profile of Local Health Departments, that are relevant to local health departments' tobacco prevention and control activities. Additionally, it compares the 2010 data with data from the 2008 National Profile of Local Health Departments to identify changes that have occurred in these services over time.

Smoke-Free Housing Programs and Initiatives in Local Health Departments and Boards of Health

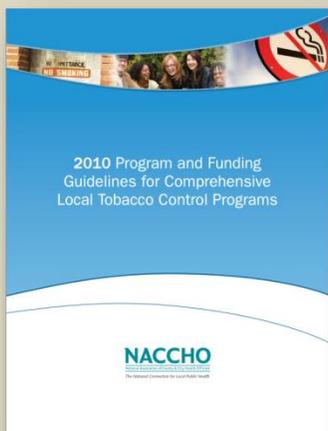

Tobacco

Online

June 2010

Local health departments (LHDs) and boards of health (BOHs) nationwide support many efforts that help promote, implement, and enforce smoke-free housing policies. This fact sheet shares effective actions and efforts of LHDs and BOHs currently engaged in this work and suggestions for starting similar local initiatives to reduce secondhand smoke exposure in homes.

2010 Program and Funding Guidelines for Comprehensive Local Tobacco Control Programs

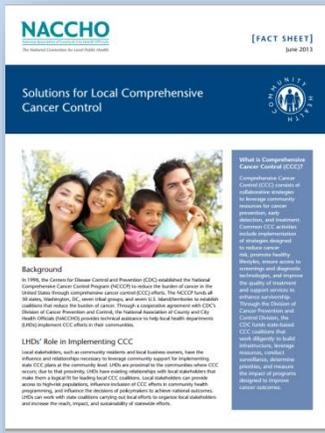

Tobacco

Online/Print

The Program and Funding Guidelines for Comprehensive Local Tobacco Control Programs (Guidelines) are designed to provide local health departments with practical information and guidance on funding levels, evidence-based strategies, and program components in much the same way that CDC's Best Practices for Comprehensive Tobacco Control Programs (Best Practices) does for states.

Solutions for Local Comprehensive Cancer Control

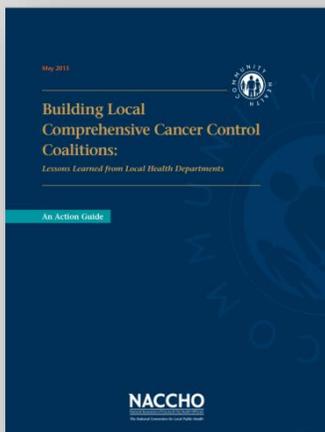

Cancer

Online

June 2013

With funding from the CDC, NACCHO has developed a Framework for Building Successful and Sustainable Cancer Coalitions to help LHDs collaborate with state partners to implement CCC activities. The Framework, accompanied by an Action Guide and online toolkit, provides guidance, tools, and resources to help LHDs develop and lead collaborative efforts to prevent cancer in their jurisdictions.

Action Guide for Building Local Comprehensive Cancer Control Coalitions: Lessons Learned from Local Health Departments

Cancer

Online

May 2013

The findings of this research revealed priorities and opportunities for the expansion of Comprehensive Cancer Control (CCC) activities and services at the local level in alignment with state CCC plans. NACCHO translated these findings into the development of a Framework for Building Successful and Sustainable Local Cancer Coalitions. This action guide synthesizes the components of the framework into general recommendations that local health officials, policymakers, public health practitioners, advocates, and researchers can use to build community coalitions that facilitate the coordination of CCC efforts among national, state, and local partners.
